**THE MISSING LINK BETWEEN YOU AND YOUR KART SEAT
THAT INSTALLS TO YOUR EXISTING SEAT IN MINUTES**

FOR IMMEDIATE RELEASE

7/20/03

Corona, CA

Win Better More Often!

GPAD revolutionizes the race kart world with release of the GPAD high-performance seat insert system. GPAD easily installs to your existing kart seat in minutes and is designed and engineered to significantly reduce rib pain and injury, hip pain and bruising, upper and lower back pain, lumbar stress, and transfer of vibration from track to chassis to driver – resulting in reduced driver fatigue and better lap times. GPAD absorbs and dissipates energy generated by lateral g-force, shock and vibration. GPAD material is up to 26% more efficient than racing gel, 40% lighter than gel, does not feel like jelly, and won't freeze. Unlike racing gel and other closed cell foams, the more energy applied to GPAD, the more efficient it becomes. The GPAD system is anatomically designed to protect critical and problematic driver body areas that are in direct contact with the seat. GPAD conforms to driver's body and promotes proper fit of driver to seat, which reduces body-roll and pivot during high performance driving. Works with or without rib vests. Win better more often with GPAD. GPAD is proudly made in the USA and protected by US and international patents. GPAD offers special discounts to verifiable kart clubs and teams.
